Truman Professors Receive Grant to Fund Plant Genome Research

Brent Buckner, associate professor of biology, and Diane Janick-Buckner, associate professor of biology, were recently awarded a National Science Foundation grant. Buckner and Janick-Buckner are co-principal investigators on a grant awarded within the Plant Genome Research Program.

The grant, titled "Functional Analysis of Genes Involved in Meristem Organization and Leaf Initiation," is a collaborative effort between the Truman researchers and the laboratories of Michael Scanlon from the University of Georgia, Patrick Schnable from Iowa State University, and Marja Timmermans from the Cold Spring Harbor Laboratories. Scanlon is the senior principal investigator.

The award is for a total of \$3,939,129 during a four-year funding period. The Truman State University research effort

will receive more than \$173,000 of support for its four-year commitment to this collaboration. The main research effort will be focused on using Laser Capture Microscopy and Gene Microarray analysis to understand the gene interactions that take place during the differentiation of shoot apical meristem cells into leaf tissues.

Once the microarray data is generated, Truman students will be involved in the bioinformatics analysis of these data. Truman students already involved in this project are Sara Murray, junior health science major from Eden Prairie, Minn.; Anup Parikh, senior computer science and biology double major from Kirkwood, Mo.; Mike Ravenscraft, senior biology and business administration double major from Festus, Mo.; Chris Spencer, junior biology major from St. Louis; and Jackie Weiss, senior biology major from St. Louis.

Come for a night of conversation during dinner with your favorite professors.

Mathematical Biology Initiative Awarded National Science Foundation Grant

Jon Beck, associate professor of computer science, and Jason Miller, associate professor of mathematics, with assistance from Michael Kelrick, professor of biology, and Jeff Osborn, associate professor of biology, were awarded a \$100,000 grant from the National Science Foundation to support their Mathematical Biology Initiative.

The Mathematical Biology Initiative is an ambitious effort to help prepare undergraduates for careers or graduate programs that will have them working at the intersection of the mathematical and biological sciences. The award will support the development of innovative courses and course materials, the creation of research experiences for undergraduates and for faculty, and will support faculty and student travel to professional conferences.

The grant has been awarded for a two-year period. The grant award is indirectly

associated with the mathematics and computer science division's current four year, \$400,000 National Science Foundation scholarship program, the Support for Undergraduate Scholars in Mathematics and Computer Science program.

The Mathematical Biology seminar is aimed at exposing local opportunities for faculty and students to work in mathematical biology, and already participants have identified several exciting and accessible areas for investigation. All students and faculty are invited to participate in this seminar at 3:30 p.m., biweekly on Thursdays, in Violette Hall 1200. Those with questions can contact any of the four faculty mentioned above for more information. A calendar for the seminar is available at the Mathematical Biology Initiative home page located at <http://vh216801.truman.edu/MathBio2003/>.

Truman Forensics Team Hosts "Show Me" Swing Tournament

Participants from more than nine states plan to visit Truman for the third annual Truman State University "Show Me" Swing Forensics Tournament Sept. 26-28.

Competitors will be able to enter one or both of two individual speaking event tournaments or a separate tournament in a Lincoln-Douglas or Parliamentary Debate.

The three-day event is often called a "swing" tournament, in which two separate tournaments are hosted on the same campus during the weekend. Expected participants will come from schools in Florida, Illinois, Iowa, Kansas, Kentucky, Michigan, Missouri, Nebraska and Texas. Additional possible participants include schools from Arkansas, Indiana,

Minnesota, Montana and New Mexico.

The first half of the weekend, the Buck Stops Here Invitational ("Show Me" Once), will be hosted by members of Truman's chapter of Pi Kappa Delta, the national speech honorary fraternity. The second half of the swing, the Bulldog Alumni and Parents Tournament ("Show Me" Again), will be co-hosted by parents, program alumni and current students of the forensics program.

The entire tournament is open to the public.

For more information, contact Kevin Minch, assistant professor and director of forensics, at 785.5677 or visit <http://forensics.truman.edu/tournament.html>.

Detours and Index Win National Journalism Awards

The Society of Professional Journalists awarded two student publications and a former student with prestigious Mark of Excellence Awards at the national convention Sept. 11-13 in Tampa, Fla.

Detours won a 2002 national third place for Best Student Magazine published more than once a year, and *Index* won a 2002 national third place for Best All-Around Non-Daily Student Newspaper published

less than twice a week. Both of those awards were based on calendar year 2002.

In addition, Luke Trautwein won a 2002 national second place in General News Photography for "Budget woes worsen." Trautwein was competing with all schools, regardless of size. Truman was the only school of all sizes that had two publications as national finalists.

United Way Continues to Seek Group Leaders for Campus Fund Drive

The campus fund drive for the Adair County United Way is still seeking group leaders to conduct the 2004 campaign.

Alpha Sigma Gamma Launches Annual Breast Cancer Awareness Week

The women of Alpha Sigma Gamma service sorority will have their third annual fund-raiser in recognition of Breast Cancer Awareness Week from 11 a.m. until 4 p.m., Oct. 1-3, on the Quadrangle.

A "Show Your Support" display will be featured all week with decorated bras made by faculty, staff, students and members of the Kirksville community.

Individuals may sponsor and decorate a bra in exchange for a \$3 donation. The donation goal for the organizations is \$20. T-shirts will also be available for \$8.

There also will be a candlelight vigil at 7 p.m., Oct. 2, by the Flame to the Second

Century for a ceremony that will feature speakers and poems from individuals who have felt the effects of breast cancer in their own lives.

The goal of the week is to join together the University campus and the Kirksville Community in raising money to help fight breast cancer. All donations are welcome. All proceeds received during the week will go to the National Alliance for Breast Cancer Organizations to be used for breast cancer research.
